# WELCOME TO THE WHOOFAMILY

We're thrilled you've chosen Whoo.ai for your access control needs! To ensure a smooth and seamless one-day transition, please make sure to complete the following steps before installation

## Confirm Internet Access at the Front Entrance

Please ensure there is a stable and reliable internet connection available at the building's main entrance, as this is essential for the intercom system to function properly.

## Ensure your installer has invited you to the Whoo Console

As an administrator, you'll be able to add all tenants and have their information set up in advance. We recommend holding off on sending app download invitations to tenants until the intercom system is fully installed and confirmed to be working properly.

## Once the intercom is up and running, you may begin inviting tenants

If you need help with this step, please refer to the Whoo Manager Guide.
